

d+b facades
OVERCLADDING SPECIALISTS

Richmond Building, University of Bradford

Richmond Building, University of Bradford before

PROJECT SCOPE

The project comprised design and build of an insulated aluminium rainscreen and replacement windows. Additional works undertaken included brise soleil to the roof and curtain walling to the main fire escape stairwell.

Client Testimonial

The service we received was excellent with quality products delivered on time and within budget. We now have the first phase of a modern, energy-efficient building and would have no hesitation in using d+b facades on the subsequent phases. Improvements to the internal environment are equally as dramatic.

Clive Wilson,
Director of Estates
