

NORTH EAST SCOTLAND COLLEGE

d+b facades
OVERCLADDING SPECIALISTS

North East Scotland College,
Aberdeen City Campus

PROJECT SCOPE

Ten storey tower and three storey East block

- Aluminium rainscreen cassette overcladding
- Single ply overroofing
- High-performance integral composite windows
- Curtain walling
- New entrances to Gallowgate & Loch Street prior to overcladding.

Client Testimonial

The new City Campus is a strong statement of the College's commitment to provide high quality learning and teaching facilities in the heart of Aberdeen. The design by BPA Architects has given the City of Aberdeen a building that is being admired already. D&B Facades overcladding allowed the College to extend the operating life of our buildings at significantly less cost and environmental impact than would have been the case if we had undertaken a new build.
