CONTRACT VALUE £3.5m

PROJECT DURATION 19 weeks per phase 1998/1999

PROJECT SCOPE

The project comprised design and build of an insulated aluminium rainscreen and replacement windows to two buildings. Additional works undertaken included curtain walling.

Client Testimonial

The project was a triumph of co-operation and excellent organisation. We are delighted with the management of the contract. The campus now has two attractive, energy-efficient high-rise buildings that require minimum exterior maintenance well into the 21st Century.
