OVERCLADDING SPECIALISTS

Stoke-on-Trent College
'A' and 'B' Blocks

REFERENCE CONTACT

David Holmes, Estates Manager
Cauldon Campus, Stoke Road, Shelton
Stoke-on-Trent ST4 2DG
T: 01782 208208
E: dholm1sc@stokecoll.ac.uk

TYPE OF CONTRACT

JCT Design and Build 2011

CONTRACT VALUE for A + B £1.7m

PROJECT DURATION

March to April 2013

Client Testimonial

"Working closely with the client's estates team, d+b facades carried out rainscreen overcladding works incorporating new windows and over-roofing to two buildings. One of the buildings was empty at the time of the over cladding works, as it was undergoing a full internal refit, the other building remained fully occupied throughout the works".

David Holmes, Estates Manager

PROJECT SCOPE

Insulated aluminium rainscreen overcladding and high-performance replacement windows to 'A' and 'B' Blocks. Overcladding the existing curtain wall which formed the central link staircase and lift shaft. Additional works included render to columns and roof plant room, replacing external doors, and landscaping. By adopting an overcladding approach to the project existing asbestos was safely and permanently encapsulated, thereby negating the need for removal.
