PROJECT SCOPE

Building B (Avon)
Building C (Wylie)

Aluminium Rainscreen

Aluminium Window Pods
 containing Timber
 Aluminium composite
 windows

Concrete Repairs &
 Coatings to Concrete
 Gable

Re-Roofing of Entrance
 Canopy.

“d+b facades recently completed a project for us at Wiltshire College & University Centre, to overclad the roadside elevations of the Avon and Wylie Buildings at our Salisbury campus. These large, five storey buildings were originally constructed in the 1960’s and, although still structurally sound, were certainly showing their age. The overcladding solution designed and provided by d+b and the architect can only be described as ‘transformative’ and, with a frontage directly onto the A36 Southampton Road, has become a great advert for the College. We now have contemporary looking buildings with a performance to match that of a new build, but for a greatly reduced cost.”

Andy Hill, Head of Estates and Services
